

Our deal of the day feature allows you to offer specific products at a fixed rate using an interactive countdown timer. This form of product promotion heightens the sales experience, helping to push your customers to buy products now, and not later. Consumers love coming to websites and finding discounts, freebies, and/or great deals on products. All it takes is the perfect “find” - just one or two items found on your site to ensure they will come back later for more.

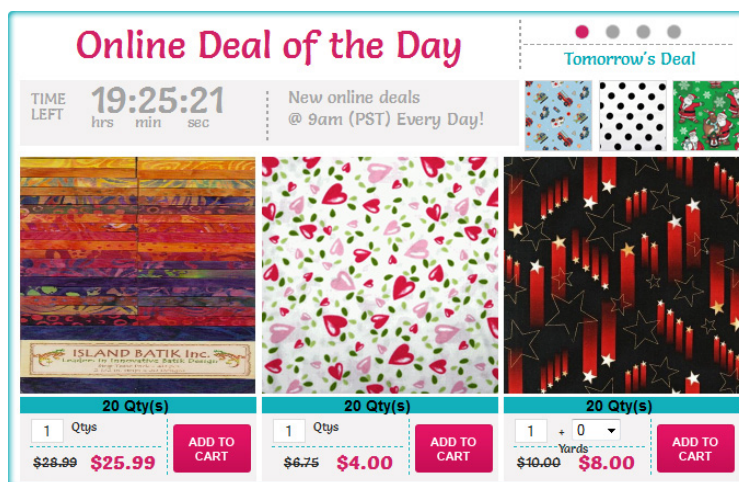

This promotional feature, if presented in the right way, will help your website achieve instantaneous results and high profit margins. The deal of the day feature is hosted on a sub-domain, and can be intergraded with the same theme as your website, or can be customized to fit your specifications.

The Deal of the Day feature gives customers a good reason to visit your web page. With Kaizen's unmatched design techniques, powerful backend technology, and customizable features, this e-Commerce solution is perfect for boosting your revenue and profit margins.

We have experience in designing Deal of the Day features for hundreds of websites across the globe. Their sites were hits and we're confident when we say that your e-Commerce can be a hit too. Here are some of the features we offer in our Deal of the Day package:

What Exactly is the Deal for YOU?

Who doesn't love a bargain! Consumers are always looking to save money without compromising their lifestyle. The Deal of the Day feature helps provide opportunities for significant savings on products at fixed time intervals. For true shopaholics, this feature proves to be sensational and impossible to resist.

Great deals on your site can mean increased traffic, more click-throughs and better conversions for your business!

Another benefit of the Deal of the Day feature is its convenience and accessibility. Unlike retail stores, customers need not wait in long lines, cut out coupons, and blunder through the hustle and bustle of traffic. Online transactions save time and alleviate all those shopping headaches caused by crowds. No "standard operating hours" either - nine to five is officially a thing of the past - at least when it comes to shopping!
